Do you recognize this?

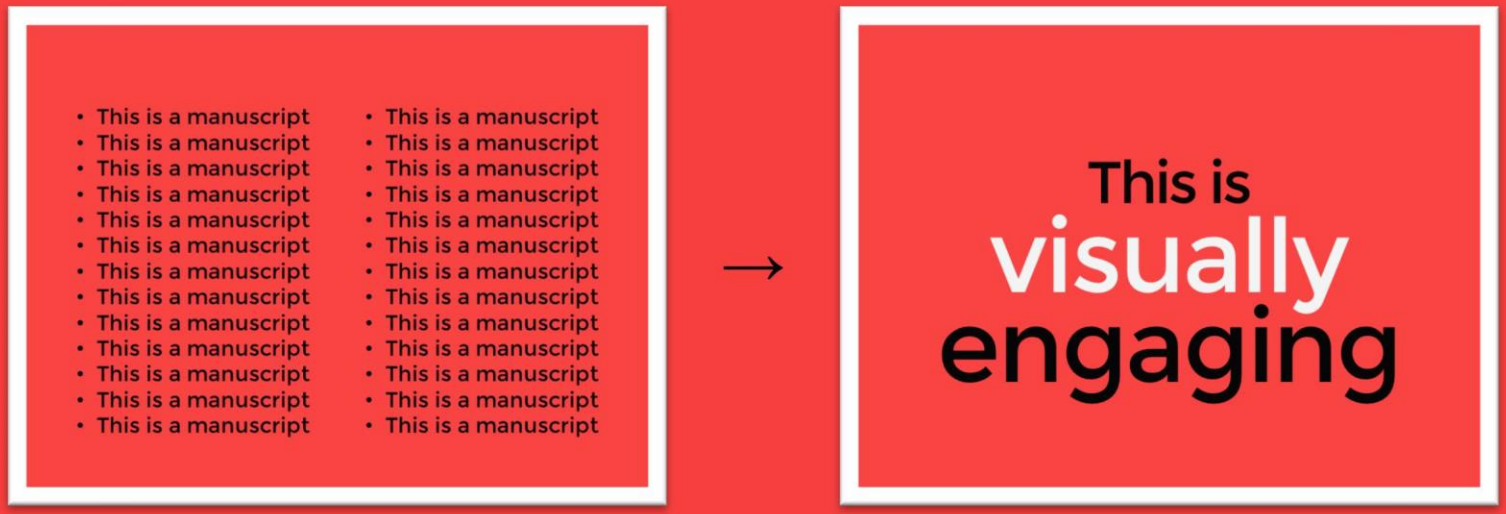
- Slides with multiple paragraphs of text have shown to significantly decrease the attention of the audience, and thus the effectiveness of getting your message across.

- Since we can’t read and listen at the same time, this basically tells the audience to read directly off the slides and stop listening to you.

Let your slides **breathe**.

It lets your audience **listen** to you.

Do not use the slide as a manuscript



Break up your bullet points into separate slides
